

Registration No:	Photograph	Education Details	Technical Skills	Project Details	General Comments
2012cs026	Try to resize the photo (Must be more visible than this). Initial contacts details must be go along with the photo. Consider about changing the font.	Looks ok , but try to put the facts in a more appealing way. Try to change the font and alignments. Put your GPA (only if it an OK figure),one way or another most probably they would ask it in the interview	Be more comprehensive when specifying your technical skills. You can increase the comprehensiveness by merging this technical skills with your project . For example <i>TourSriLanka Web Site</i> " highlight the project as ; Project name : TourSrilanka Web Roles played: Developer, QA etc. Technologies used : Java, C++, Android etc. Then It would be easier for the interviewer to filter out your particular skills and how you have used it	Embed more projects here and try to use the format i have mentioned under "Technical Skills". You can put projects that you have done for individual subjects as well. (i.e Cryptography, OS etc.) If you have any working links of your project, please mentioned here.	Try to make your CV more appealing for the interviewer . Try to change the template or the font usage in the CV If you do have "Linkedin Account".Please share your profile link in the beginning (under Initial contact details)
2012cs032	Try to resize the photo (Must be more visible than this). Initial contacts details must be go along with the photo. Consider about changing the template and the overall format of the CV.	Looks ok , but try to put the facts in a more appealing way. Try to change the font and alignments. Put your GPA (only if it an OK figure),one way or another most probably they would ask it in the interview	Try to embed the roles you have played in these projects. (i.e SE, QA etc) and the respective technologies you have used. Then It would be easier for the interviewer to filter out your particular skills and how you have used it.	Change the format as i mentioned earlier in the technical section.	Think of introducing an "Objective" section into your CV (just check and talk with your friends and see how to compile a one) Give some genuine effort on this (Benchmark it with your friends). Using only bulletins aren't help you to pass the initial screening of your CV. If you do have "Linkedin Account".Please share your profile link in the beginning (under Initial contact details)

2012cs043	Looks good	Looks Good. Short and simple and have covered most of the aspects.	Be more comprehensive when specifying your technical skills. You can increase the comprehensiveness by merging this technical skills with your project . For example “ <i>Online reservation system</i> ” highlight the project as ; Project name : <i>Online reservation system (Including the client)</i> Roles played: Developer, QA etc. Technologies used : Java, C++, Android etc. Then It would be easier for the interviewer to filter out your particular skills and how you have used it	Change the format as i mentioned earlier in the technical section.	Your CV is pretty much good. You have given some genuine effort on this. I don't know about your job preference; but if you are aiming for a developing job (SE) then your objective is ok (Try to conflate more SE related projects.); but if u are wishing to follow a BA role (since you have done CIMA etc.) ; then u might have to rephrase the objective in such away that captures both the job aspects. If you do have “Linkedin Account”.Please share your profile link in the beginning (under Initial contact details)
2012cs044	Error 404 (Not found !!) Don't use your full name in the heading (Sandeepa Fernando is fine)	Combine your Education and Academic qualification sections (School-O/L, A/L results, University- GPA) Don't quote as “ongoing” in the Academic section (Denote it as 2012-2015 etc.)	Good, you have listed down and segregated really well. You don't have to open up a separate section as Technical skills since you have mentioned those below the projects.	Move them into the projects section (Then it is easy to summarize your potency and how you have applied in your projects)	Rephrase your objective and profile. Try to conflate that you are a techie guy (if you are applying for a SE job)

2012cs052	Looks Ok.	Mention your GPA as well. (If it is too low then don't)	Be more comprehensive when specifying your technical skills. You can increase the comprehensiveness by merging this technical skills with your project . For example ; Project name : project1 Roles played: Developer, QA etc. Technologies used : Java, C++, Android etc.	Embed more projects here and try to use the format i have mentioned under "Technical Skills". Map the technical skills with the projects	Overall satisfactory CV Create a Linkedin account and mentioned the link in the header.
2012cs054	Try to resize the photo (Must be more visible than this). Initial contacts details must be go align with the photo.	Mention your GPA as well. (If it is too low then don't)	Be more comprehensive when specifying your technical skills. You can increase the comprehensiveness by merging this technical skills with your project . For example ; Project name : project1 Roles played: Developer, QA etc. Technologies used : Java, C++, Android etc.	Try to use the format i have mentioned under "Technical Skills". Map the technical skills with the projects	Rephrase your objective section. Create a Linkedin account and mentioned the link in the header. Try to make your CV more appealing for the interviewer . Try to change the template or the font usage in the CV
2012cs055	Looks ok. But the image must be clear than this. Only use Nuwan Hettiarachi; in the personal details section give the full name, DOB, NIC Give the immediate contact details in the header section (Along with the image)	Mention your GPA as well. (If it is too low then don't) Align your listings And quote the duration as (2011-Present)	Be more comprehensive when specifying your technical skills. You can increase the comprehensiveness by merging this technical skills with your project . For example ; Project name : project1 Roles played: Developer, QA etc. Technologies used : Java, C++, Android etc.	if you are listing down the skills ; be ready to give examples and show them in the interview. So it's a bit tricky to put these stuff in the CV. Think about it again. "Ability to working with computer related software"? (You don't say :P)	Rephrase your objective section. Create a Linkedin account and mentioned the link in the header. Give some genuine effort on this (Benchmark it with your friends). Using only bulletins aren't help you to pass the initial screening of your CV.

2012cs059	Image must be clear than this.	<p>Mention your O/L & A/L results along with your school and the time period u studied (remove school from personal information and put it here)</p> <p>Try to shorten your O/L result list (i.e 8 As' and 2 Bs')</p>	<p>Rather than isolating the projects itself try to conflate with the technologies. You can increase the comprehensiveness of the CV by merging this technical skills with your project . For example ; Project name : project1 Roles played: Developer, QA etc. Technologies used : Java, C++, Android etc.</p>	<p>Map the technical skills with the projects</p>	<p>Rephrase your objective and profile section. Show it and get some review from a staff member</p> <p>Create a Linkedin account and mentioned the link in the header.</p> <p>Give some genuine effort on this (Benchmark it with your friends). Using only bulletins aren't help you to pass the initial screening of your CV.</p> <p>Try to limit the CV into 3 pages.</p>
2012cs061	<p>Image must be clearer and larger than this.</p> <p>Remove heading "Curriculum vitae"</p> <p>Mentioned the name as "Ishan Isuranga" as the name in the header.</p> <p>Separate your personal address and mobile number</p>	<p>Mention the time period you were at Bandaranayaka College (i.e 2000-2010)</p>	<p>Rather than isolating the projects itself try to conflate with the technologies. You can increase the comprehensiveness of the CV by merging this technical skills with your project . For example ; Project name : project1 Roles played: Developer, QA etc. Technologies used : Java, C++, Android etc.</p> <p>You have adhered to aforementioned format into some extent, but try to conflate it more !!</p>	<p>Map the technical skills with the projects ; so u don't need to come up with a separate section to list down your technical skills</p> <p>This makes life easier to CV reviewer as well</p>	<p>Give some genuine effort on this (Benchmark it with your friends). Using only bulletins aren't help you to pass the initial screening of your CV.</p> <p>Create a Linkedin account and mentioned the link in the header.</p> <p>Rephrase your objective section. Show it and get some review from a staff member</p>

2012cs062	Error 404 (Not found !!)	<p>Mention your GPA under university studies</p> <p>Mention your O/L & A/L results along with your school and the time period u studied</p>	<p>Try to comply with below model.</p> <p>Project name : Project-1</p> <p>Roles played: Developer, QA etc.</p> <p>Technologies used : Java, C++, Android, QA tools etc., when mentioning about the projects</p>	<p>Map your technical skills with the projects that you have involved</p>	<p>Give some genuine effort on this (Benchmark it with your friends). Using only bulletins aren't help you to pass the initial screening of your CV.</p> <p>Check whether your linkedin profile link working (u have to put the link)</p> <p>Objective and personal summary looks good.</p> <p>Remove interested areas section (u are referring to the same position in the CV)</p> <p>Just think about the font and the font size.Need some improvements on the structure of the CV (just go through some sample templates)</p>
